- Minor

Scattered thunderstorms
Thunderstorms initially affecting mountains of Arizona with some moving into lower elevations, including the Phoenix metro. Strong winds, blowing dust, heavy rain, and localized flooding possible.

Thunderstorms with heavy rainfall
Scattered to numerous showers and thunderstorms over Arizona; Isolated over southeast California. Heavy rainfall and localized flooding will be the main concern with moderate to major impacts possible for south-central and southwest Arizona. Strong winds also possible, particularly west of Phoenix.

Thunderstorms with heavy rainfall
Widespread showers with scattered thunderstorms across south-central Arizona. Scattered thunderstorms across southwest Arizona & southeast California. Heavy rainfall and localized flooding could bring moderate to major impacts to south-central and southwest Arizona. Strong winds also possible, particularly west of Phoenix.

Isolated thunderstorms
Thunderstorms mainly affecting mountains of south-central Arizona with some moving into lower elevations, including the Phoenix metro. Strong winds, blowing dust, heavy rain, and localized flooding possible.
