Telecommunication Specialist at Army Test and Evaluation, Yuma Proving Ground in Yuma, Arizona, United States
Job ID# 4928191 on www.azjobconnection.gov
Full Time - Permanent
Pay Rate: $79,363 - $103,176 Annual, DOE/DOQ

Job Description
The United States Army Test and Evaluation Command is posting this advertisement for the subject position. The chosen candidate will serve as a Telecommunication Specialist supporting the Network Enterprise Center, Yuma Proving Ground, Yuma, AZ. A selection will be made soon after the closing date. Selection of this position will be made at the GS-0391-12 grade level.

Job Responsibilities
Serves as a telecommunications specialist performing site surveys, traffic studies, providing cost estimates, and/or reviewing cost estimates of work pertaining to telecommunications systems which consists of inside cable plant systems, outside cable plant systems (i.e., fiber optics, copper and coaxial, access holes, and duct systems) transmission systems and premise wiring which is associated with new construction, upgrades, and renovations for Yuma Proving Ground, Network Enterprise Center (NEC).

As an Telecommunications Specialist you will:

- Performs various aspects of configuration design and implementation planning for telecommunications systems and assist in the accreditation and certification process for all telecommunication hardware and software.
- Reads, interprets, and comments on exterior and interior telecommunication facilities, infrastructure, cabling plans, and design drawings, in both inch and metric formats.
- Reads, interprets, and provides major design input to engineering blueprints to ensure accuracy and completeness of the telecommunication systems.
- Prepares, reviews, and finalizes cost estimates for information systems to be used by Corps of Engineers/DOD/Army for justifying military construction dollar requirements.
- Reviews all communications projects proposed by contractors or architects associated with the installation, replacement, abandonment, relocation, or modification of inside and outside plant wire communications facilities providing base telecommunications.
- Performs a full range of support involved in designing information systems (IS) projects for new construction as well as modification and repair to existing communications facilities relocation, or modification of inside and outside plant wire communications facilities providing base telecommunications.
- Performs cable splicing of fiber optic and twisted pair outside plant telecommunications cables.
- Installs, tests, troubleshoots, maintains, configure and repairs telecommunications equipment and wiring for adds, moves and changes.
- Performs cable locates and approvals for excavation permits.
• Responsible for drafting Statements of Work (SOW) and Performance Work Statements (PWS) for Outside Plant/Inside Plant, Network and premise wiring contracts which outlines standards and specifications under which the contractor shall perform.
• Attends meetings with contractor personnel, government contracting officers, and project engineers as required.
• Perform duties associated with configuring, installing, and troubleshooting network switches and routers for minor adds, moves, and changes.
• Requires close coordination with the network operations center (NOC) and Information Assurance Network Manager (IANM) to ensure all necessary IA compliance is attained.

Job Requirements
In order to qualify, you must meet the experience requirements described below. You will receive credit for all qualifying experience, including volunteer experience. Your resume must clearly describe your relevant experience.

Minimum Eligibility Requirements for Telecommunications Specialist
You must meet the experience requirements below:

• Specialized Experience: One year of specialized experience which includes experience in evaluating, analyzing, developing, managing, or improving communications systems, procedures, and requirements that demonstrated knowledge of current developments and trends in communications concepts and technology. This definition of specialized experience is typical of work performed at the next lower grade/level position in the federal service GS-11.

HOW YOU WILL BE EVALUATED:
You will be evaluated on the basis of your level of competency in the following areas:

• Skill in Telecommunication Support and Design
• Skill in Communication
• Attention to Detail
